General Dentistry Overview

General dentistry focuses on prevention, diagnosis, and treatment of oral diseases.

Routine dental checkups help detect cavities, gum disease, and oral infections early.

Dental hygiene includes brushing, flossing, and professional cleaning.

Dental Services (Detailed)

Dental cleaning (scaling) removes plaque and tartar.

Tooth filling repairs cavities using composite or amalgam materials.

Root canal treatment (RCT) removes infected pulp inside the tooth.

Tooth extraction removes severely damaged or decayed teeth.

Teeth whitening improves tooth color using bleaching agents.

Dental implants replace missing teeth permanently.

Orthodontic treatment (braces) aligns teeth and corrects bite issues.

Dental Treatment Price List (India)

Treatment	Price Range (INR)	Notes
Consultation	300 - 800	Initial diagnosis
Scaling & Cleaning	1000 - 3000	Depends on plaque
Tooth Filling	1500 - 4000	Composite filling
Root Canal	4000 - 10000	Depends on tooth
Extraction	800 - 3000	Simple or surgical
Teeth Whitening	6000-15000	Laser/chemical
Dental Implant	20000-50000	Per tooth
Braces	30000-100000	Metal/ceramic/invisible

Common Dental Problems

Tooth decay is caused by bacterial infection leading to cavities.

Gum disease (gingivitis, periodontitis) affects gums and bone.

Tooth sensitivity occurs due to enamel erosion or gum recession.

Bad breath (halitosis) can result from poor oral hygiene.

General Questions

How often should I visit a dentist? Dentists recommend visits every 6 months.

Is root canal treatment painful? Modern RCT is usually painless due to anesthesia.

What is the cost of dental implants? Implant costs vary from 20,000 to 50,000 INR.

How long does teeth whitening last? Whitening results may last 6 months to 2 years.

What are braces used for? Braces correct misaligned teeth and bite issues.

Can cavities heal naturally? No, cavities require professional treatment.
